Cookie Policy

What are cookies?

This Cookie Policy explains what cookies are, how Bramley Commercial Finance Ltd uses them and how you can manage them.

Cookies are small text files placed on your device by a website or service. Similar technologies can store or access information on your device. Cookies and associated identifiers may relate to personal information, including when used for security.

How do we use cookies?

We use Cloudflare Pages to host and deliver our website, with necessary hosting and security functionality. We do not use advertising or optional analytics tracking.

BCF’s own website code does not set cookies. Our photographs, scripts and styles are served from the website, and we use system fonts. Cloudflare may set security cookies when the relevant protection feature is enabled or a security check is triggered. Using Cloudflare Pages does not mean that all Cloudflare cookies are used.

Types of Cookies we use

Necessary

The table below describes the Cloudflare security cookies relevant to this setup. Each cookie is conditional on its corresponding security feature being used and may not be present on every visit.

Conditional public-site security cookies

Cookie	Provider	Purpose	Duration	When it applies	Category
__cf_bm	Cloudflare	Helps identify and manage automated traffic to protect the website.	30 minutes of continuous inactivity.	Conditional: Bot Management or Bot Fight Mode is enabled.	Necessary security, when used.
cf_clearance	Cloudflare	Records a completed security challenge or clearance result so the visitor can continue browsing.	Varies with the issuing feature. Challenge clearance follows the configured Challenge Passage period (Cloudflare default: 30 minutes).	Conditional: the relevant challenge or JavaScript-detection protection is used.	Necessary security, when used.
_cfuvid	Cloudflare	Helps a rate-limiting rule distinguish visitors who share an IP address.	Expiry is set by Cloudflare when the cookie is issued.	Conditional: a rate-limiting rule uses visitor identification.	Necessary security, when used.

These cookies are not all issued on every visit. Which cookies are used depends on the security feature applied to the visit or request.

Cloudflare documents these cookies at https://developers.cloudflare.com/fundamentals/reference/policies-compliances/cloudflare-cookies/.

Other functional technology, separate from cookies

Technology	Provider	Purpose	Duration	Category
Browser page history	Your browser, used by BCF's website code	Restores opened scenario cards, carousel position, page position and selected enquiry context. Form entries are not placed in this history.	For the relevant browser history entry, subject to your browser's session and history settings.	Functional navigation; not a cookie.

Analytics

We do not use advertising cookies or optional analytics tracking. The website code does not use local storage, session storage, IndexedDB or service workers for tracking.

Third Party

Cloudflare provides our hosting and security services. We do not embed third-party video players, maps, social-media feeds or CAPTCHA services. Other websites have their own privacy and cookie policies when you choose to visit them.

Social Media Website

The website does not embed social-media tracking or widgets. Following a link to another website takes you to a separate service with its own cookie information.

Manage cookie preferences

Cookies or similar technologies that are strictly necessary to deliver or secure the service you request do not require consent. We use these necessary functions without an optional-cookie consent banner or preferences panel.

If we introduce non-essential technologies that require consent, appropriate consent and withdrawal controls will be provided before those technologies are used.

You can inspect, block or delete cookies and site data through your browser settings. Blocking necessary security cookies, where used, may prevent a protected service from working.
